Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1 to 7, drawn to a method of treating solid tumor in a mammal, classified in class 514, subclass 1+.

II. Claims 8 to 14, drawn to method of potentiating the effects of a chemotherapeutic regimen in a mammal, classified in class 544, subclass 1+.

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different effects.

In the instant case, while Invention I is directed to the treatment of any tumors in a mammal, Invention II is drawn to potentiating the effects of any chemotherapeutic regimen in a mammal.

- Clearly the effects of each method of treatment are different and
- A given reference disclosing or suggesting any of the said invention under the meaning of 35 USC 102 or 35 USC 103 cannot be used to reject the non disclosed or suggested invention under such articles (35 USC 102 or 35 USC 103)

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1625

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim 1 is generic to a plurality of disclosed patentably distinct species comprising tumors while claim 8 is generic to a plurality of disclosed patentably distinct species comprising chemotherapeutic regimen or cancer types.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1625
